

Container Paint Field

CMP is a pioneer of the container paint market in China and succeeded in being one of the world leaders in this market with due to its vast knowledge and accumulated experience. Our container paints respond to the environment and thus lead the paint industry, by introducing odorless paints for inside of container in consideration of goods to be carried within, developing water-based paints for the reduction of VOC, and promoting paints containing neither lead nor chromium. CMP have made an effort to work for the global environment, which is indispensable for world trading development of the coatings industry.

Development of Eco and User-friendly products

Fetid Free Paint (FF Series)

The word 'FF' is an abbreviation of 'Fetid Free'. FF paint has been developed as an eco-friendly product to achieve a non-irritating odor generated by thinner evaporation on the interior of the container, with unique methods of removing irritant solvents such as xylene and toluene from interior topcoat paint and floor board paint and neutralizing the complex odor.

Interior Topcoat Paint
EPICON SC INTERIOR NP-FF
 (Various colors available)
 *Complies with FDA regulation

Wooden Floorboard Paint
POLYULAC NO.200 F-HB
 (Clear or Chocolate Brown)
 *Complies with FDA regulation

Lead or chromium free paints

CMP continues its effort to eliminate lead or chromium from its finish coatings, and will also eliminate them from container paints, by gaining the understanding and support from customers.

Water-based paints

For the protection of the global environment, CMP is aware that there is an urgent need to reduce organic solvent (main component of VOC) from container paints, which usually contain organic solvent. In developing products for the reduction of VOC, CMP has set a main goal of developing water-based paints.
