

CMP Honorably Receives Paint Order :
Morandi Bridge Replacement Project in Genoa, Italy

CHUGOKU-BOAT ITALY S.p.A., a group company of CHUGOKU MARINE PAINTS, LTD. (hereafter called "CMP") secured the order for Morandi Bridge Replacement Project in Genoa, Italy.

Suffering from the tragedy of Morandi Bridge collapse in last August, Genoa city decided to replace the bridge with another designed by worldwide architect Renzo Piano from Genoa. By advancing the anticorrosion technology acquired from our marine paint business, CMP has developed the heavy duty coating products for buildings on the land. So far, we have received orders of heavy duty coatings for many bridge projects not only in Japan, but in China, Vietnam, Bangladesh, India, Sri Lanka and other Asian countries, and have accumulated experience of application.

This Morandi Bridge replacement project is our first receipt of order for a large bridge project in the European region, which is believed that our track record of many bridge projects brought us to this order receipt. Paint application on this bridge has started in May 2019, and the project is expected to be completed in one year. CMP will be further promoting heavy duty coatings for bridge projects overseas and contribute to the development and improvement of social infrastructure in each country.
